WHAT IS EXILIS?

**NON-INVASIVE TREATMENT SYSTEM FOR REDUCTION
OF TARGETED FAT DEPOSITS**

WHAT DOES IT DO?

- ◇ Provides effective body reshaping for all your aesthetic practice's clients
- ◇ Utilizes a revolutionary new platform for volume reduction and reshaping of problematic areas of the body
- ◇ Results in marked improvement in skin tone, elasticity and texture
- ◇ Uses innovative technological breakthroughs with outstanding results
- ◇ Ensures maximum safety and user control through improved handpiece design

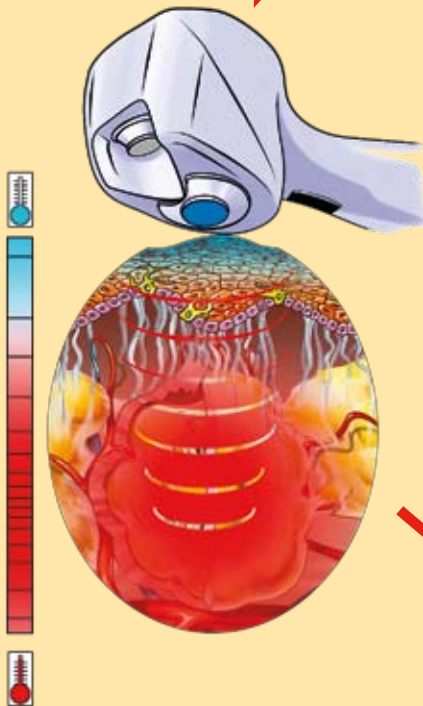

REVOLUTIONARY TECHNOLOGY

Exilis helps people **get RID of excess fat** in just three simple steps:

REACH → **ISOLATE** → **DEACTIVATE**

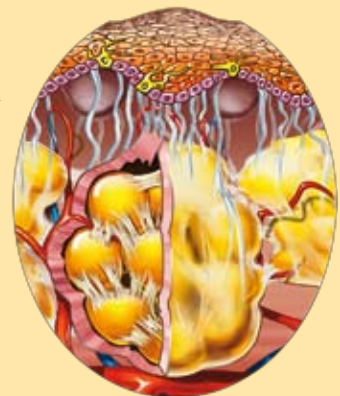

BEFORE

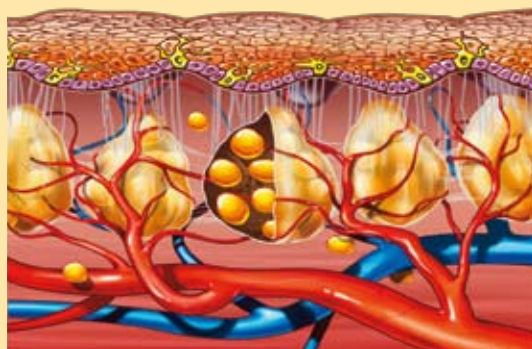

REACH

The combined ultrasound and high-frequency energy allows access and treatment of previously resistant tissue. EXILIS targets precisely defined deeper fat layers, while contact cooling of the surface regulates the temperature of the skin and protects fine dermal structures.

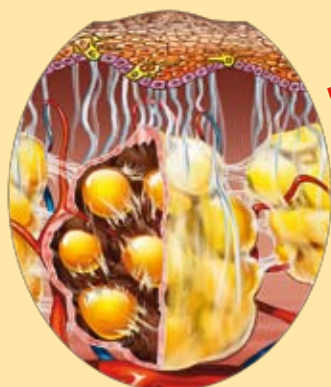

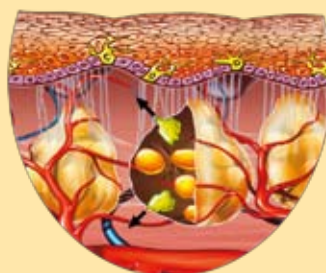

- ◇ The only device that delivers both **ultrasonic waves and controlled heating to the tissue**
- ◇ Revolutionary medical effect of combined mechanical action and uniform molecule excitation
- ◇ Precisely **targeted, most effective** and **rapid contouring solution**
- ◇ **Unique safety features**

AFTER

DEACTIVATE

Fat deposits are typically composed of metabolically inactive cells. High-frequency energy causes targeted deep thermal heating. Metabolic activity is initiated and local fat tissue lipolysis processes are accelerated. At the same time apoptosis diminishes the amount of adipocytes. Fat cell volume decreases and the fat layer is reduced.

ISOLATE

EXILIS' ultrasound waves break up the fibrotic fat structures, causing the separation of the fat-cell defensive formation into individual units. The exposed fat cells are then more isolated and accessible than ever and are ready for effective treatment.

UNIQUE SAFETY FEATURES

DTC - Dermal Temperature Control System

- ◇ Superficial skin temperature displayed at all times on applicator's easy-to-read screen
- ◇ Adjustable treatment temperature
- ◇ No more scars due to homogenous energy distribution
- ◇ No need of footswitch

EFC - Energy Flow Control System

- ◇ Embedded body contact check for both patient and operator safety
- ◇ Output power adjustable on the applicator
- ◇ Easy-to-control transmitted energy
- ◇ More efficient results

EXCELLENT RESULTS

FAT REDUCTION

Circumference reduction: **-10 cm**

before

after 4 Tx

BODY SCULPTING

Circumference reduction: **-7 cm**

before

after 4 Tx

RESHAPING

Circumference reduction: **-5 cm each thigh**

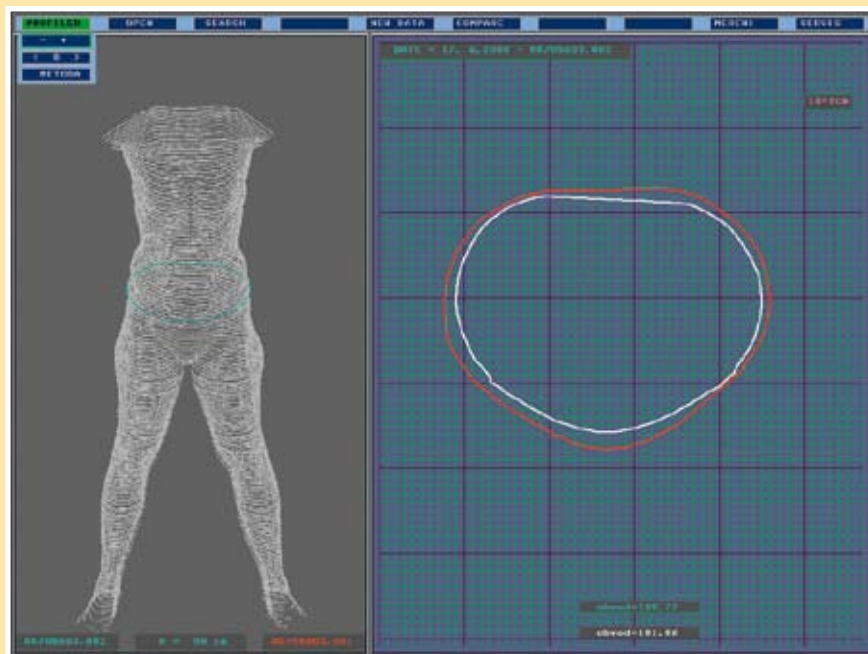

before

after 4 Tx

ADDITIONAL EFFECTS:

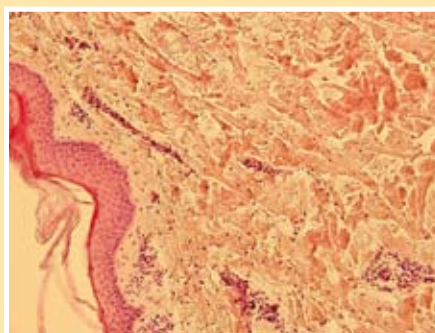

- ◇ Tightening
- ◇ Improved skin texture
- ◇ Cellulite reduction

CLINICALLY TESTED

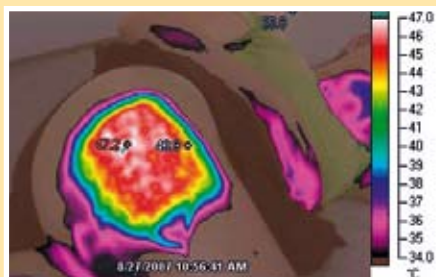

PREVAS laser system - 3D volume reduction screening

- ◇ Supported by extensive research
- ◇ No harm to body organs proven by biochemistry testing
- ◇ Clinically tested both in vivo and in vitro

Histology - areolar connective tissue

Post procedure thermography scan

UNRIVALLED ADVANTAGES

- ◇ **The fastest and most powerful treatment system on the market**
- ◇ State-of-the-art safety control systems DTC and EFC incorporated in the ergonomic handpiece
- ◇ Easy to use touchscreen interface with preset parameters
- ◇ Programmable user protocols
- ◇ With open software system your device will grow with your needs
- ◇ No disposables

CLIENT SATISFACTION GUARANTEED

- ◇ No pain / no anesthesia
- ◇ Noticeable changes after 1st treatment
- ◇ No downtime
- ◇ Very fast treatment
- ◇ Progressive and measurable results
- ◇ Best results after 4 sessions
- ◇ Multiple effects evenly spread

OWNER'S BENEFITS

- ◇ Significant minimally-invasive body modification has never been so affordable for your clients
- ◇ Profitable novelty on the market
- ◇ Short treatment time means time for more procedures
- ◇ Treatment can be delegated to trained personnel
- ◇ Financial advisory assistance
- ◇ Rapid return on investment
